

Wooltex UK Ltd

Environmental Policy

The company is based in West Yorkshire and is a textile manufacturer of contract upholstery and fabrics.

Wooltex UK carries out various manufacturing processes in house and in addition sources raw materials and processes from various parts of the world and from within the UK.

Wooltex UK Limited are committed to operating in a manner that prevents pollution and achieves continual improvement in the protection of the environment in the most practical way. In addition to the commitments in its quality, health and safety policies, the Companies Environmental Management System aims to enhance our environmental performance and therefore we will:

- Demonstrate a commitment to comply with all relevant legislation and compliance obligations such as climate change agreement/Environmental permit and other industry codes of practice.
- Seek to protect the environment and prevent pollution in the formulation of our products and the operation of our manufacturing processes by making efficient use of energy and water. Minimising waste and maximise recycling of materials.
- Develop and maintain appropriate procedures to implement this policy, including assigning responsibility for managing the Company's environmental aspects and impacts, compliance obligations, risks and opportunities, and providing the necessary information and training to ensure all employees are environmentally responsible for their activities
- Take account of the concerns of interested parties such as regulators, shareholders and the public and make this policy available to our interested parties via our website.
- Set and regularly review objectives and targets to support continual improvement of the Environmental Management system to enhance performance.
- Encourage all our suppliers to adopt similar policies to reduce the environmental impact upstream and downstream.
- Make climate resilience, pollution controls, biodiversity and sustainable resource use a priority across all our business activities.
- Formulate a climate change adaption plan in advance of extreme weather incidents that may affect business operations/ supply chains/consumers and markets.

This policy will be implemented within the framework of an Environmental Management System in accordance with ISO 14001:2015, working towards the revised ISO 14001: 2026 edition for full implementation by the 2029 deadline.
